## Annual Statistical Summary 2016

### Overall Summary

Total Urine Tests	53
Total Adverse Analytical Findings	1
Total Anti-Doping Rule Violations	0

### Testing Details

In-Competition Urine Tests	25
Out-of-Competition Urine Tests	18
Samples tested for ESAs	6
Samples tested for GHRF (GHS/GHRP)	6

### Results Details

AAF Findings*	1
Non-Analytical ADRVs	0
* The AAF result was Meldonium with 1.3 µg/mL concentration. Upon consultation with WADA, NO FAULT was found based on WADA's 30 June 2016 Meldonium Notice. However, since the athlete admitted to using meldonium after 29 September, 2015, the athlete was disqualified from the competition at which the doping control test was conducted.
